

**State Project No. 713-53-0115
Cooper Road Bridge Over Cooper Creek
Tangipahoa Parish
(Estimated Construction Cost: \$469,981.50)**

The existing structure is functionally obsolete with a load posting of 10-15 tons. The new structure will be much wider to support the current and anticipated traffic count in this area.

The proposed structure's construction will add additional workers to a contractor's payroll and assist them in meeting equipment loan payments and payroll overhead costs.
